Task

I want to create citations like [1, p.30]
and show it in the margin....

... done!!!

Another citation [2]

and [3]

Problems

The only problem I see now is that supplements like p. 30 should be part of the full citation text. Something like

[1] E. R. Tufte, Visual Display of Quantitative Information, Second. Cheshire, Connecticut: Graphics Press, 2001; p.30.

I guess for each CSL there is a correct way to include the supplement, but you get the idea.
